

SyncFit Pricing Policy

Last updated: September 2025

Overview

SyncFit is a wellness scheduling app that helps users find time for fitness and self-care. It operates on a freemium model with optional subscription access to premium features.

Free Trial

New users receive a 7-day free trial of SyncFit Premium. During the trial, all premium features are fully accessible. No payment is charged until the trial ends.

Subscription Pricing

After the free trial, users can continue using SyncFit Premium for £5.99 per month. This is a recurring monthly subscription billed via the app store (Google Play or Apple App Store).

Subscription Management

Users may manage or cancel their subscription at any time through their app store account settings. Cancellations prevent future charges but do not refund past payments unless required by platform policy.

Auto-Renewal

All subscriptions automatically renew each month unless cancelled before the renewal date. You will be notified of any price changes in advance.

Refund Policy

Refunds are handled according to the policies of Google Play or the Apple App Store. SyncFit does not process refunds directly. Users should request refunds through the relevant store.

Taxes

Subscription prices include applicable VAT and taxes where required. Final pricing may vary by region based on local tax laws.
