— SQUARED · GETTING STARTED

SQUARED.

Built for leaving the forces. Reads your CV and SJAR/OJAR write-ups, translates military language into plain civilian English, scores job ads against your real experience, and drafts tailored CVs and cover letters. **Nothing it writes is invented.**

01 · SIGN IN (GOOGLE)
`arcturusdc.com/apps/stea/squared`

02 · PRIVATE WORKSPACE
`wayne - squared`

Your workspace is private to you — nobody else can see what you upload.

01 Set up your record

TAB · 05 CONFIG

No CV yet — or haven't downloaded your SJARs from JPA? You can build from scratch in 3 minutes.

- **No CV yet?** Click **Build my first CV in 3 mins** in 01 Your CV. Answer 4 quick questions in your own words (forces shorthand is fine) and it writes your first ATS-clean civilian CV & profile.
- **Have a CV or SJAR?** Upload your CV (PDF/Word) or paste an SJAR/OJAR into the **Translator** to turn military bullets into plain-English achievements.
- **Service Record:** Check your branch, rank, trade, years served, clearance, and clearance year (checks your SC/DV transfer window).
- **Target & Stretch Roles:** Set target roles (or use the ones Squared suggests for your trade) and hit **Save**.

02 Find or paste a role

02 SCANS · 01 PIPELINE

Search live UK job boards or bring a role you've already spotted elsewhere.

- **02 Live Scans:** Enter keywords, location, work mode (remote/hybrid/on-site), and minimum salary. Searches Reed & Adzuna, filters out noise, tags SC/DV mentions, and ranks matches.
- **01 Pipeline (Paste any ad):** Many veteran-friendly roles sit on **Civil Service Jobs** (including the *Great Place to Work for Veterans* guaranteed Stage 2 scheme) or defence prime sites (BAE, Babcock, QinetiQ).
- Just copy the full job description text from any site and paste it into **01 Pipeline**.

03 Score it before you apply

TAB · 01 PIPELINE

Hit **Analyse & score** (~15 seconds) before spending an evening on an application.

`A · Apply now` `B · Worth applying` `C · Stretch` `D · Skip`

- **Score out of 5** across Role fit, Sector familiarity, Location/work pattern, Salary, and Evidence match.
- Shows where your service record transfers strongly, where you're light, and how to address gaps in your cover letter.
- Every role you analyse is saved in your pipeline so you can come back to it anytime.

04 Tailor CV, apply & prep

03 CV · 04 APPLY

Turn a good-fit role into an ATS-clean application and interview briefing.

- **Company Research & Tailor CV:** Pull live employer intel, then generate a single-column, ATS-clean civilian CV tailored to that exact role (with AI revision & inline editing + PDF download).
- **Cover Letter & Portal Q&A:** Writes a 250–350 word cover letter, standard form answers, and answers any bespoke portal question you paste in.
- **Interview Prep Brief:** 1-click briefing with your 60-second pitch, top 5 likely questions mapped to your service record, and questions to ask them.

OPSEC CHECK BEFORE UPLOADING

Before uploading a CV or SJAR/OJAR, strip out operation names, deployment locations, unit postcodes, or anything you wouldn't put in front of a civilian employer. Describe the scale, leadership, and outcome.

SUGGESTED 10-MINUTE FIRST RUN

1. Click **Build my first CV in 3 mins** (or upload CV) → **2.** Check your suggested target roles & save → **3.** Search or paste one real job → **4.** Score it & tailor a CV for it.

250 ACTIONS INCLUDED

Your workspace is pre-loaded with **250 actions** (editing and saving are always free). If you ever need more, just message David or use your access code.
