STEA · DAVID LOAKE CAREER OPS · OPERATOR PLAYBOOK · D-SITE-081

CAREER OPS

Your end-to-end role evaluation, CV tailoring, portal co-pilot, and interview briefing engine. Every stage now shares **persistent company context**, **inline markdown editing**, and **OpenAI GPT-4o** prefix caching.

WORKSPACE CONFIG	● LIVE ON MAIN
URL	arcturusdc.com/apps/stea/career
Workspace	David Loake Career Ops
Primary LLM	OpenAI gpt-4o (+ Web Search)
Fallback LLM	Anthropic claude-sonnet-4-6

01 // END-TO-END OPERATOR FLOW

Setup once → evaluate → research → tailor → submit → prep

01 · BASELINE Setup
Master Profile & CV
Upload PDF/DOCX/MD CV, proof points, target archetypes, salary floor, and scoring weights.

02 · EVALUATE Scans / Pipe
Discover & Score
Scan job boards or paste a JD URL/text. Scores A–F across 6 weighted dimensions + red flags.

03 · NEW Pipeline
Research & Context
Run 1-click AI web research on the company or add insider notes. Feeds every generator automatically.

04 · NEW CV + Apply
Tailor, Edit & Answer
Revise tailored CV via prompt or inline editor, generate cover letter, and answer custom portal Qs.

05 · NEW Role Drawer
Interview Brief
Generate a 1-click briefing with STAR stories, gap mitigation, and sharp reverse-interview questions.

02 // NEW IN-UI CO-PILOT CAPABILITIES (D-SITE-081)

Zero terminal copy-pasting — everything saves directly to Firestore

NEW 01 · Pipeline Drawer + Apply Assist · 1 action (AI) · Free (Save)

Company & Role Context Engine

Every analysed role now has a persistent **Company & Role Context** brief that is automatically injected into CV tailoring, cover letters, portal answers, and interview prep.

- → Click `✦ AI Research Company` to run a live web-search synthesis (product strategy, stage/funding, tech stack, culture, and 3 high-leverage angles).
- → Add your own insider notes, recruiter takeaways, or specific angles to emphasise, then click `Save Notes` (free).

NEW 02 · CV Library + Apply Assist · 1 action (Revise) · Free (Edit)

Iterative CV Revision & Inline Editor

No more one-shot CV generation. Refine any tailored CV directly inside Career Ops before exporting to styled **.docx** or **PDF**.

- → **AI Revision Prompt:** Type an instruction (e.g. `Emphasise regulated AI governance & SoRR; trim early career`) and click `✦ Revise with AI`.
- → **Inline Markdown Editor:** Click `✎ Edit Text` to tweak any bullet or metric by hand and save for free.

NEW 03 · Apply Assist → Portal Answers · 1 action (Ask) · Free (Edit)

Custom Portal Question Co-Pilot

When Workday, Greenhouse, or Ashby throws a bespoke screening question at you mid-application, generate a grounded answer on the spot.

- → Paste the exact question + optional guidance (word limit, proof point to cite) and click `✦ Draft Answer`.
- → Appends to your saved Q&A list for that role, persists across reloads, and supports inline editing + 1-click copy.

NEW 04 · Pipeline → Role Detail Drawer · 1 action · Cached on role

1-Click Interview Prep Brief

When a role moves toward screening or interview, open its drawer in **Pipeline** and generate a tailored tactical briefing.

- → Covers: **30-second positioning pitch**, likely questions with **STAR proof points** from your CV, gap/red-flag defences, and 4–5 sharp questions to ask the panel.
- → Saved permanently to the role card with `Copy Brief` and `Regenerate`.

03 // HIGH-LEVERAGE 10-MINUTE APPLICATION WORKFLOW

1. Score JD
Paste role URL or JD in **Pipeline → Analyse Role**. Only pursue **A / B** fits.

2. Research
Click **✦ AI Research Company** in the drawer; add any personal angle.

3. Tailor & Export
Generate CV, prompt-revise or inline-edit if needed, and export **.docx / PDF**.

4. Portal Co-Pilot
Generate cover letter + standard Qs, then use **Custom Question** for portal curveballs.

04 // ENGINE & COST TELEMETRY

Active Model	gpt-4o (CAREER_OPENAI_MODEL)
Prefix Caching	50% input discount (auto)
Avg Cost / Action	~$0.017 USD (~1.3p GBP)
Full Role Pack (5x)	~$0.085 USD (~6.5p GBP)
