— SQUARED · GETTING STARTED

SQUARED.

Built for leaving the forces. Reads your CV and SJAR/OJAR write-ups, translates military language into plain civilian English, scores job ads against your real experience, and drafts tailored CVs and cover letters. **Nothing it writes is invented.**

01 · SIGN IN (GOOGLE)
`arcturusdc.com/apps/stea/squared`

02 · PRIVATE WORKSPACE
`wayne - squared`

Your workspace is private to you — nobody else can see what you upload.

01 Set up your record first

TAB · 05 CONFIG

Takes ~5 minutes on your first visit and powers every score and CV draft after it.

- **Upload your CV** (PDF or Word) and hit **Save & extract** — it fills in your profile and past roles automatically.
- **Service Record:** Check your branch, rank, trade, years served, clearance, and the **year your clearance was granted/renewed** (checks your SC/DV transfer window).
- **SJAR / OJAR Translator:** Upload or paste appraisal write-ups to turn military bullets into plain-English achievements, then click **+ Add to evidence**.
- **Target & Stretch Roles:** Set the roles you're aiming for, step-up stretch roles, and salary floor/target, then hit **Save**.

02 Find or paste a role

02 SCANS · 01 PIPELINE

Search live UK job boards or bring a role you've already spotted elsewhere.

- **02 Live Scans:** Enter keywords, location, work mode (remote/hybrid/on-site), and minimum salary. Searches Reed & Adzuna, filters out noise, tags SC/DV mentions, and ranks matches.
- **01 Pipeline (Paste any ad):** Many veteran-friendly roles sit on **Civil Service Jobs** (including the *Great Place to Work for Veterans* guaranteed Stage 2 scheme) or defence prime sites (BAE, Babcock, QinetiQ).
- Just copy the full job description text from any site and paste it into **01 Pipeline**.

03 Score it before you apply

TAB · 01 PIPELINE

Hit **Analyse & score** (~15 seconds) before spending an evening on an application.

`A · Apply now` `B · Worth applying` `C · Stretch` `D · Skip`

- **Score out of 5** across Role fit, Sector familiarity, Location/work pattern, Salary, and Evidence match.
- Shows where your service record transfers strongly, where you're light, and how to address gaps in your cover letter.
- Every role you analyse is saved in your pipeline so you can come back to it anytime.

04 Tailor CV & apply

03 CV · 04 APPLY

Turn a good-fit role into a civilian-ready application without starting from a blank page.

- **Tailor CV:** Rewrites your CV in plain civilian English to match what *this* employer is asking for, with a note on what changed. Downloadable as a clean PDF.
- **Cover Letter:** 250–350 words grounded in your real evidence. Ask for edits in plain English (*"make it shorter"*, *"lead with team size"*).
- **Form Answers & Copy Fields:** Drafts answers to *"Why this role / why us?"* and keeps your address, notice period, and recent roles ready to copy box-by-box.

OPSEC CHECK BEFORE UPLOADING
Before uploading a CV or SJAR/OJAR, strip out operation names, deployment locations, unit postcodes, or anything you wouldn't put in front of a civilian employer. Describe the scale, leadership, and outcome.

SUGGESTED 10-MINUTE FIRST RUN
1. Upload CV & save Config → **2.** Translate one SJAR paragraph → **3.** Paste one real job you'd genuinely consider → **4.** Score it & tailor a CV for it.

20 FREE ACTIONS

Editing and saving are free. When you run low on actions, **don't pay the £5 top-up** — click **"Have an access code?"** and enter the code from David for unlimited use.
